

Prop Glove™ Size Chart

Model - Medium - Fits 2010-2011:

- Yamaha 150
- Mercury 90, 150, 175, 300
- Suzuki 140, 175
- Honda 115, 150, 200, 225

This model may fit other outboards measuring:

- Measurement A is approximately 6"
- Measurement B is approximately 25 ¾"
- Measurement C is approximately 21 ½"

Model - Large - Fits 2010-2011:

- Yamaha 200, 225, 250, 300

This model may fit other outboards measuring:

- Measurement A is approximately 7"
- Measurement B is approximately 26 ½"
- Measurement C is approximately 21 ½"
- See measuring diagram for where to measure your motor
- Motors above had 15.25" propellers

If the current model does not fit your motor send us an email at info@propglove.com with the make, model and dimensions of your motor and we will add you to our database and contact you when a model is available to fit your motor.

Measurement A - Measure the width of the cavitation plate from side to side.

Measurement B - Measure from the back of the cavitation plate to the front of the motor.

Measurement C - Measure from the back of the propeller to the front of the motor.
